INTEGRATION KIT

Integration Kit includes the API that the hospital system has to provide or consume to have a real time integration. All API would be running on HTTPS and would consume or provide data in JSON format

ZEALTHIX has built-DEDICATED SINGLE WINDOW SUITE for cashless claim management activity done by Hospitals and other healthcare service providers through its flagship brands. ZEALTHIX has the capability to manage inpatient as well as outpatient services covered under health insurance policies in a Digital and Cashless format through its dedicated Tech Suites Viz. **Zive** for OPD cashless Claims and **Zyncflo** for IPD cashless Claims.

Here is the list of API that the hospital system has to provide or consume to have a real time integration with Zyncflo. All API would be running on HTTPS and would consume or provide data in JSON format.

All of these APIs will be hosted on the hospital side.

API Name	Description	Method
Patient Details	This API would be used to get patient details from HIS.	Zealthix → HIS
Patient Visit Details	This API would be used to get patient visit details from HIS.	Zealthix → HIS
Visit Documents	This API would be used to get patient visit documents from HIS.	Zealthix → HIS
Update Claim	This API would be used to update claim details in HIS.	Zealthix → HIS

Patient Details

Endpoint: `/claim/patient/find`
Method: POST
Description: This API would be used to get patient details from HIS.
Request Headers:

```
X-Api-key   : [string, required]
```

Request

```
{
   "patientId": "728934",
   "mobileNumber": "",
   "ipNumber": "",
   "abhaNumber": "",
   "ipdVisitType": ""//OUTPATIENT | INPATIENT | FINANCIAL_COUNSELLING
}
```

Response (200):

```
{
   "success": true,
   "message": "success",
   "data": [
```

```
        {
            "patientId": "12345",
            "name": "",
            "email": "",
            "phone": "",
            "visitId": "",
            "departmentName": "",
            "doctorName": "",
            "visitDateTime": "",
            "visitType": "",
            "doctorId": "",
            "amount": 0,
            "type": "",
            "payerId": ""
        }
    ]
}
```

Patient Visit Details

Endpoint: `/claim/patient/visit`
Method: POST
Description:This API would be used to get patient visit details from HIS..
Request Headers:

```
X-Api-key    : [string, required]
```

Request

```
{
    "visitId": "2343",
    "visitDateTime": "2022-01-01T00:00:00",
    "visitType": ""//OUTPATIENT | INPATIENT | FINANCIAL_COUNSELLING
}
```

Response (200):

```
{
    "success": true,
