

OT — Package Mapping Guide

For the administrator setting up Operation Theatre · generated 2026-08-07 · 242 active packages

Source: the LIVE system (13.234.242.13), read on 2026-08-07 — not the demo database.

WHY THIS IS NEEDED

The price of a surgery lives on the IPD package, not in the OT module. Your surgical price list already exists as IPD packages — 41 at Axten, 201 at Advise. OT used to keep a second price list of its own, which nobody ever filled in, and that is the main reason the module was never switched on.

What OT still needs is the *clinical* facts a package does not carry: how long the procedure takes, what kind of theatre it needs, whether it needs ICU afterwards. That is what a **surgery master** is for. Each one points at the package that prices it.

WHAT HAPPENS ONCE A PROCEDURE IS MAPPED

- Booking that surgery for an **admitted patient on that package** bills **nothing extra** for surgeon, anaesthesia or theatre — the package already includes them.
- **Implants** are still billed at actuals on top, because every package excludes them.
- A patient with **no package** is billed the fee-for-service rates instead.
- A patient with **no admission** (day care, OPD procedure) is billed to an OPD invoice.

HOW TO ENTER IT

1. Go to **Admin → OT Setup → Surgery Master**.
2. **Code** — a short unique code. Reusing the package code is simplest, e.g. GSURG-005.
3. **Surgery name** — what surgeons call it. It may differ from the package wording.
4. **Category** — use the section headings in the tables below.
5. **Duration** — realistic knife-to-skin to close, in minutes. This drives the calendar, so a wrong figure creates false clashes or gaps.
6. **Priced by IPD package** — choose the matching package. The three fee boxes grey out; that is expected.
7. Click **Add Surgery**. The catalogue will show the package price and code.

Only map a package that genuinely is a surgical procedure. Packages for medical admissions (dialysis, fever, observation) are not surgeries and should be left alone.

Do not fill the fee boxes when a package is chosen. Two prices for one procedure will drift apart and nobody will know which is right. Use the fee boxes only for procedures your hospital genuinely bills fee-for-service, with no package selected.

BEFORE YOU START — TWO DATA PROBLEMS IN THE LIST

147 of the 201 Advise packages are priced at ₹0. Almost all are HEGIC-* codes — an insurance/TPA scheme list loaded without rates. **Do not map a ₹0 package to a surgery.** If you do, that surgery bills nothing at all: the package "covers" surgeon, anaesthesia and theatre, and the package itself is worth nothing. Get the rates filled in first, or map the priced equivalent instead. *Axten is clean — all 41 packages are priced.*

167 Advise packages have no category (7 at Axten). They are listed under *Uncategorised* below. That affects only how they are grouped here, not billing — but it makes them hard to find, so it is worth fixing in Admin → IPD Finance while you are in there.

SUGGESTED ORDER OF WORK

1. Start with the procedures your theatres actually run most — usually General Surgery, Obstetrics & Gynaecology, Orthopaedics.
2. Do one category, then book a test surgery and check the bill before continuing. A mistake found after 200 rows is 200 rows to correct.
3. Leave rarely used or non-surgical packages unmapped. An unmapped package still works for IPD billing exactly as it does today — mapping only adds the OT booking path.

KNOWN LIMITATION, WORTH UNDERSTANDING

OT currently checks whether the **admission** carries a package, not whether it is the package for *this* surgery. If a patient is admitted on one package and has an unrelated second procedure, OT will treat the second as covered too.

In practice the admission usually exists for the surgery, so this is right in the common case. Mapping the catalogue below is what will let us tighten it.

Cosmetic / Plastic Surgery 5

CODE	PACKAGE / PROCEDURE	PRICE	VALID	SURGERY MASTER CODE
COSM-027	Bariatric Surgery	₹2,80,000	7d	
COSM-029	Breast Implant - Bilateral with Implant	₹1,40,000	7d

CHECKLIST

- Every procedure your theatres regularly perform has a surgery master.
- Each one either points at a package, or has fee-for-service rates — never both.
- Durations are realistic, not all left at 60 minutes.
- A test booking on a packaged patient shows "Covered by package" on the OT bill.
- An implant added to that surgery still appears as a charge.
